## EXPERIENCE

### Idelji Corporation: Full Stack Software Engineer

Santa Monica, CA  
2021 – Present

- Working on 2 full-stack web applications to analyze and process data for different clients
- Responsible for website updates, fixes, and new items to be placed on the website using JavaScript, MySQL, HTML & CSS, the frameworks we currently use are AngularJS, Angular and Django.
- Implemented Continuous Integration and deployment (CI/CD) of Angular 2+ application using Jenkins on AWS EC2.
- Implemented Test Driven Development for an existing Angular Project

### Creative Aero Engineering Solutions: Software Engineer Intern

2021 – 2021

- Designed and built optimized landing pages in HTML and CSS, including saas integration and crossbrowser compatibility to support marketing.

### Freelancing Projects

- **L2A(LovetoAir)** – A website where buyers can air their grievance about sellers. (MVP)
  - **Tech-Stack:** ReactJs, Node.js, Express. MySQL.
  - Implemented Database schema from scratch.
  - Created backend server using Node.js, Express.
  - Used FETCH, CORS to write API's to fetch data from DB.
  - Used the data from backend to implement streamlined UI with complex components following UI design principles. Ex- (React Data table, Image Upload Service).
  - **Deployment:** Heroku, CI/CD: GitHub.
  - <https://lovetoair.herokuapp.com/>
- **BULLSVSBEAR** – Option Sweep Website (STOCK-MARKET)
  - Tech-Stack: React, Node
  - **Deployment:** Heroku, CI/CD: GitHub
  - <https://bullsvsbears.herokuapp.com/>
